

*From our skilled
hands of artisans
unique Gold and Silver jewels get shape*

Welcome to our company and family.

For over 50 years, we've been creating hollow-gold-tube jewellery, from casting to the finished product. With our hands, experience and love for the craft, we take care of every step of production in our workshop in Monticello Conte Otto, near Vicenza, where we attend to each and every item, down to the smallest detail.

Because our mission is to share with you the joy of a job performed to perfection.

Silvano & Luciano Speggiorin

Information:

The standard size of all the bangles is 50x60 mm. Upon customer request we can change it from a minimum of 40x50 mm to a maximum of 60x70 mm. All the bangles are handmade: weight tolerance of 7%. The weights of 14 kt items are approx 10% less than 18kt. The weights of silver items are similar to 18 kt.

Information:

We use the same clasp since 1970. It can work thanks to a combination of button and tongue, both in white gold to keep safety and durability. Instead if we are talking about silver bangles, the button is in silver but the tongue is in steel. Upon customer request we can also add the safety catch.
