

## SIZE GUIDE

The most requested size for the bangle is the standard 60x50mm which usually fits all wrists. For special sizes you will find our proposals in the chart. To obtain the best fitting, the jewel must have an internal circumference of at least one centimeter more than the circumference of the client's wrist. For your requests for sizes other than the standard, we ask you to indicate the desired size. The production of the bangles with special dimensions requires different times, costs and processes from the standard.
